California State University, Sacramento — BS Business Administration, 2020 | GPA: 3.55

FULL STACK WEB DEVELOPMENT TRAINING
Full Stack Web Development Bootcamp, **University of California, Davis**
Data Analytics Certificate Course, **Break Into Tech**

FULL STACK WEB DEVELOPMENT PROJECT EXAMPLES

- **EFT Ballistics.** EFT Ballistics is a comprehensive ballistics calculator crafted specifically for Escape from Tarkov (EFT) enthusiasts. Leveraging the Tarkov API, this MERN stack application seamlessly fetches data to provide accurate insights into damage, armor penetration, fragmentation chance, bullet velocity, recoil effects, and accuracy for various ammunition types within the game. EFT Ballistics offers additional functionalities such as account creation and the ability to save favorite ammo types directly to your profile. Powered by a GraphQL and MongoDB backend, and featuring a sleek React.js and Bootstrap frontend, this application ensures a seamless and immersive experience for players.
- **Expense Tracker Dashboard.** The Expense Tracker Dashboard is a full stack web application designed to streamline expense management. Built using MySQL as the database, Sequelize as the ORM, and Handlebars.js for templating, this application leverages the power of node.js and express.js on the backend to ensure seamless functionality. With a sleek and responsive UI powered by Materialize CSS, users can effortlessly log their expenses, categorize them, and generate insightful reports to gain valuable insights into their spending habits.
- **Stock Market Dashboard.** Powered by Materialize CSS, the Stock Market Dashboard offers users a comprehensive platform to effortlessly track stock prices and stay informed with the latest financial news. Leveraging the Alpha Vantage API and Marketaux API, users can access comprehensive stock data and real-time financial news directly within their browser. Additionally, the application ensures that user data persists across different sessions, providing a seamless and personalized experience for every user.

WORK EXPERIENCE

AAA — *Member Experience Associate*, Sept. 2015 – 2017, Jul. 2018 – Present

- Maintain the membership database by collecting and recording information through various channels such as phone, email, and chat.
- Identified and maximized sales opportunities and increased customer retention rates.
- Collaborate with cross-functional teams and management to develop and implement new initiatives to enhance the member experience.
- Analyze member data to identify trends and patterns that can improve the member experience.
- Overcome obstacles that create barriers to Team Member or branch efforts and identifies process improvement opportunities and proposes solutions.

BJ's Restaurant & Brewhouse — *Server*, Jul. 2017 – Jul. 2018

- Delivered friendly and efficient customer service, resulting in high satisfaction ratings and repeat business.
- Managed a high volume of tables and orders during peak hours, ensuring all orders were accurate, timely, and in accordance with BJ's Brewhouse food and drink quality standards.
- Accurately totaled, processed, and collected payments from guests using the point-of-sale system.
- Use customer comes first mentality, teamwork, and problem-solving to help the customer in any way possible.
